

Client Brief

The Wise Mist

Project description:

We all want to know the truth of our lives. The Wise Mist can help us. The Wise Mist has **no gender** (they/them or it/its), and takes the form of a glowing mist.

Requirements:

- Use this advice slip API
- Users should be required to input their names and a keyword at the beginning of the game
- Create a game that requires users to use the keyboard to move through a simple maze to get to the wise one at the top of a mountain (on mobile, the user can navigate by touching the screen)
- When the user has gotten to the Wise Mist, the Wise Mist will tell the user a piece of advice (from the API) based on their keyword or, if there are no responses to that keyword, a random piece of advice
- The style of the site should be “the 80’s in space”
- The Wise Mist should be animated with a CSS animation

Stretch goals:

- Harder maze
- Challenges in the maze on the way to the Wise Mist (e.g. traps that restart the maze)
- Save the names of everyone who has made the journey to the Wise Mist on Firebase
- Display the names of everyone who has made the journey to the Wise Mist

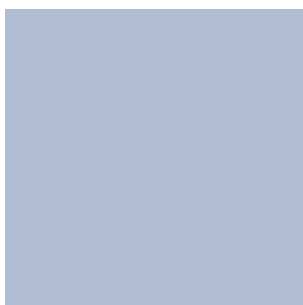

Deliverables:

- Project files up on GitHub
- Project up on GitHub pages or your own URL
- All requirements completed BEFORE any stretch goals have been attempted
