

Project description:

The latest and greatest Pokémon battle has arrived! This app should be a Blackjack style card game between two Pokémon characters. Using the PokéAPI and the Deck of Cards API, have two randomly generated characters play a game of black jack and the winner evolves!

Requirements:

- Uses the PokéAPI and the Deck of Cards API
- User operates both characters (ie. clicks buttons to generate next card, stay, etc)
- Ensure both characters are able to evolve, you may need to be specific about this in your query
- Game should be keyboard operable
- Display a visual indicator of who won, and what evolution they experienced
- Proper error handling. For example:
 - Common error responses should be handled

Stretch goals:

- Dealer mode where operator is the dealer playing against 2 Pokémon
- Animation for winning pokemon

Deliverables:

- Project files up on GitHub
- Project up on GitHub pages or your own URL
- All requirements completed BEFORE any stretch goals have been attempted
