

Project description:

Robogames is looking for the best new trivia game app! Let your nerd flag fly in whatever subject you know best! We need a trivia app where you can play trivia games against your best friends and worst enemies. The app should let you play by yourself or with whoever else has access to the game.

Requirements:

- Choose a category, level of trivia and number of people to play with!
- Have a cool animation to show the user if they got the right or the wrong answer
- Have a scoreboard displaying high scoring users
- Automatically generate a robot avatar for each user from (<https://robohash.org>)
- Proper error handling. For example:
 - If a user types in a query that yields no result - they should be provided feedback (e.g. there were no items found)
 - API loading states

Stretch goals:

- Once you beat the highest level of a category you have to navigate through a maze to get a victory badge. Try to collect all the badges.
- Have a link to send to a friend for them to try to beat your score on the same set of trivia questions.

Deliverables:

- Project files up on GitHub
- Project up on GitHub pages or your own URL
- All requirements completed BEFORE any stretch goals have been attempted

Brand Colours:

#FF0022

#41EAD4

#B91372

Heading Font: Poiret One (Regular 400)
