Out of Context Movie Spoiler
Client Brief

Juno College of Technology

Project description:

The world moves too fast and you can get lost in the chaos. Create an application that summarizes any movie plot with only GIFs.

Requirements:

- Uses The MovieDB API & Giphy API
- Users can search for any movie title
- Based on their search query, the user will be returned **three** giphy's that reflect the overall plot of the movie (look into *get-movie-keywords* section of API documentation)
- Proper error handling. For example:
  - If a user types in a query that yields no result - they should be provided feedback (e.g. there were no items found)
  - Common error responses should be handled
 - API Loading states

Stretch goals:

- Users can SAVE their results to Firebase and access a My Saved section
- Users have the option to DELETE any of their saved results
- Users can select any individual gif to generate a different one

Deliverables:

- Project files up on GitHub
- Project up on GitHub pages or your own URL
- All requirements completed BEFORE any stretch goals have been attempted
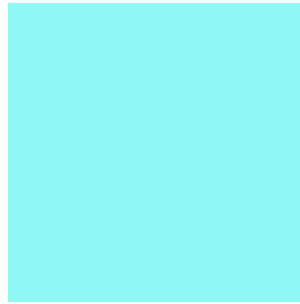

Brand Colours:

#6b6eec	#141640	#8ef9f4

Heading Font: Kanit Light (light 300)

Heading Font

Body Font: Lato (Regular 400)
