▶_ Client Brief

College Navigator

Project description:

This client is about to graduate High School and needs an app that will help them keep track of the post-secondary schools they are interested in. The app should allow users to search for colleges, universities or trade schools near a particular city. They want to be able to save personal notes to the schools they want to apply to (Weird things they noticed from a campus tour, courses offered, career services, the food, etc). This client also wants to be able to manually add institutions to their saved list (psst... maybe HackerYou?).

Requirements:

- Uses Foursquare API and Firebase
- Users can input a city and choose among "Colleges", "University" and "Trade School" and be given a list of results based on their search
- Search results of institutions should include relevant information (e.g. Name, Address, etc)
- Users can save and unsave institutions.
- Users can manually add institutions - (they can add information like Name, address, whether it's a College, University or Trade School)
- Users can add a personal note to any saved institution - users can also edit this field
- Proper error handling. For example:
    - If a user types in a query that yields no result - they should be provided feedback (e.g. there were no items found)
    - Common error responses should be handled

Stretch goals:

- Users can click on a search result to get more information (e.g. photos)
- Users can edit any of the saved info. Foursquare returns vague names for some of the institutions. It would be nice to be able to change something like "Rotman School of Management" to "Rotman School of Management - U of T"
- Sorting and filtering for search results
- Pagination for search results
- Authorization and Guest login. Guest login should have the same functionality as authorized users, except authorized users' saved items will be private. Guests can see other guests' items. (Guest account means the app should have a flow where there is no authorization required)
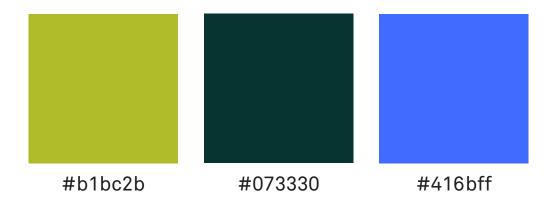

▣ Client Brief
College Navigator

Deliverables:

- Project files up on GitHub
- Project up on GitHub pages or your own URL
- All requirements completed BEFORE any stretch goals have been attempted
